

Health Sciences Centre Winnipeg

“We’ve been using the Wireless Pneumatic Thermostat system for over six years. It gives us DDC like visibility at the room level throughout our buildings with pneumatic control, and it increases our ability to ensure patients and staff are comfortable.”

Manny Bettencourt
Environmental Systems Supervisor
HSC Maintenance Services
Winnipeg, Manitoba R2E 0T3

- » 1,625 Wireless Pneumatic Thermostats (WPT) installed
- » WPTs control 780,000 square feet throughout 12 buildings, including:
 - General Hospital Centre
 - Children’s Hospital
 - Rehabilitation Hospital
 - Maintenance Building
 - Multipurpose Office Building
- » System originally installed in 2010 with annual expansions every year
- » Improved patient comfort
- » Reduced hot/cold calls and improved response time
- » Integrated with Honeywell EBI Energy Management System

About Health Science Centre Winnipeg

Health Sciences Centre (HSC) Winnipeg is the largest health care centre in Manitoba with 800 bed capacity, comprised of 31 buildings and resides on a 38-acre campus. They have an interdisciplinary team of nearly 8,000 staff and volunteers who serve people in Manitoba, northwestern Ontario and Nunavut.

HSC is the designated Trauma Centre for Manitoba, as well as the centre for transplants, burns, neurosciences and pediatric care. Their highly skilled teams of professional staff provide acute care and continuing care.

As an operating division of the Winnipeg Regional Health Authority, they provide comprehensive diagnostic, outpatient (ambulatory) and inpatient services that support the physical, medical and emotional needs of the people and communities they serve.

About Cypress Envirosystems

Cypress Envirosystems develops non-invasive retrofit solutions for commercial buildings for energy efficiency, improved comfort and lower maintenance costs.

The Wireless Pneumatic Thermostat (WPT) system is a non-invasive DDC retrofit solution for buildings with pneumatic thermostats. Cypress's WPT enables buildings to be upgraded in a fraction of the time with no disruption to occupants at 60 – 80% lower cost than traditional solutions.
